Abstract

This document contains the instructions for preparing a camera-ready manuscript for the proceedings of NetWordS 2015. The document itself conforms to its own specifications, and is therefore an example of what your manuscript should look like. These instructions should be used for both papers submitted for review and for final versions of accepted papers.

1 Credits

This document1[1] has been adapted from the instructions for the ACL-2014 proceedings by Alexander Koller and Yusuke Miyao, adapted from those for earlier ACL meetings, including those for ACL-2012 by Maggie Li and Michael White, those from ACL-2010 by Jing-Shing Chang and Philipp Koehn, those for ACL- 2008 by Johanna D. Moore, Simone Teufel, James Allan, and Sadaoki Furui, those for ACL-2005 by Hwee Tou Ng and Kemal Oflazer, those for ACL- 2002 by Eugene Charniak and Dekang Lin, and earlier ACL and EACL formats. Those versions were written by several people, including John Chen, Henry S. Thompson and Donald Walker. Additional elements were taken from the formatting instructions of the *International Joint Conference on Artificial Intelligence*.

2 Simulations

The following instructions are directed to authors of extended abstracts submitted to NetWordS 2015 or accepted for publication in its proceedings. All authors are required to adhere to these specifications. Authors are required to provide a Portable Document Format (PDF) version of their contributions. **The electronic proceedings are designed for printing on A4 paper.**

---

[1] This is how a note should appear. Note the line separating the footnotes from the text.

3 General Instructions

Manuscripts must be in two-column format. Exceptions to the two-column format include the title, authors' names and complete addresses, which must be centered at the top of the first page, and any full-width figures or tables (see the guidelines in Subsection 3.6). **Type single-spaced.** Start all pages directly under the top margin. See the guidelines later regarding formatting the first page. The manuscript should be printed single-sided and its length should not exceed the maximum page limit described in Section 4. **Do not number the pages.**

3.1 Electronically-available resources

Your PDF can be prepared using LATEX with the NetWordS 2015 style file (networds2015.sty, adapted from the official ACL 2014 style file) and the ACL bibliography style (acl.bst).

You can alternatively use Microsoft Word to produce your PDF file. In this case, we strongly recommend the use of the Word template file (networds2015.dot).

3.2 Format of Electronic Manuscript

For the production of the electronic manuscript, you must use Adobe's Portable Document Format (PDF). PDF files are usually produced from LATEX using the *pdflatex* command. If your version of LATEX produces Postscript files, you can convert these into PDF using *ps2pdf* or dvipdf. On Windows, you can also use Adobe Distiller or PDFCreator to generate PDF.

Please make sure that your PDF file includes all the necessary fonts (especially tree diagrams, symbols, and fonts with Asian characters). When you print or create the PDF file, there is usually an option in your printer setup to include none, all or just non-standard fonts. Please make sure that you select the option of including ALL the fonts. **Before sending it, test your PDF by printing it from a computer different from the one where it was created.** Moreover, some

word processors may generate very large PDF files, where each page is rendered as an image. Such images may reproduce poorly. In this case, try alternative ways to obtain the PDF. One way on some systems is to install a driver for a postscript printer, send your document to the printer specifying "Output to a file", then convert the file to PDF.

It is of utmost importance to specify the **A4 format** (21 cm x 29.7 cm) when formatting the text. Print-outs of the PDF file on A4 paper should be identical to the hardcopy version. If you cannot meet the above requirements about the production of your electronic submission, please contact the publication chairs as soon as possible.

3.3 Layout

Format manuscripts two columns to a page, in the manner these instructions are formatted. The exact dimensions for a page on A4 paper are:

- Left and right margins: 2.5 cm
- Top margin: 2.5 cm
- Bottom margin: 2.5 cm
- Column width: 7.7 cm
- Column height: 24.7 cm
- Gap between columns: 0.6 cm

Extended abstracts should not be submitted on any other paper size. If you cannot meet the above requirements about the production of your electronic submission, please contact the publication chairs above as soon as possible.

You can alternatively use Microsoft Word to produce your PDF file. In this case, we strongly recommend the use of the Word template file (networds2015.dot).

3.4 Fonts

For reasons of uniformity, Adobe's **Times Roman** font should be used. In LATEX2e this is accomplished by putting

```
\usepackage{times}
\usepackage{latexsym}
```

in the preamble. If Times Roman is unavailable, use **Computer Modern Roman** (LATEX2e's default). Note that the latter is about 10% less dense than Adobe's Times Roman font.

Type of Text	Font Size	Style
main title	15 pt	bold
author names	12 pt	bold
author affiliation	12 pt	
section titles	12 pt	bold
document text	11 pt	
captions	10 pt	
footnotes	9 pt	

Table 1: Font Guide.

3.5 Language

Manuscripts must be written in scholarly English. It is advised to supplement characters and terms not belonging to the chosen language with appropriate transliterations and/or translations since not all readers understand all such characters and terms. Inline transliteration or translation can be represented in the order of: original-form transliteration "translation".

3.6 The first page

Center the title, author's name(s) and affiliation(s) across both columns. Do not use footnotes for affiliations. Use the two-column format only when you begin the extended abstract.

Title: Place the title centered at the top of the first page, in a 15-point bold font. (For a complete guide to font sizes and styles, see Table 1) Long titles should be typed on two lines without a blank line intervening. Approximately, put the title at 2.5 cm from the top of the page, followed by a blank line, then the author's names(s), and the affiliation on the following line. Do not use only initials for given names (middle initials are allowed). Do not format surnames in all capitals (e.g., use "Schlangen" not "SCHLANGEN"). Do not format title and section headings in all capitals as well except for proper names (such as "BLEU") that are conventionally in all capitals. The affiliation should contain the author's complete address, and if possible, an electronic mail address. Start the body of the first page 7.5 cm from the top of the page.

Text: Begin typing the main body of the text immediately after the title (for submission) or the author's email (for on-line proceedings), observing the two-column format as shown in the present document. Do not include page numbers.

Indent when starting a new paragraph. Use 11 points for text and subsection headings, 12 points for section headings and 15 points for the title.

3.7 Sections

Headings: Type and label section and subsection headings in the style shown on the present document. Use numbered sections (Arabic numerals) in order to facilitate cross references.

Number sub- sections with the section number and the subsection number separated by a dot, in Arabic numerals. Do not number sub-subsections.

Citations: Citations within the text appear in parentheses as (Gusfield, 1997) or, if the author's name appears in the text itself, as Gusfield (1997). Append lowercase letters to the year in cases of ambiguity. Treat double authors as in (Aho and Ullman, 1972), but write as in (Chandra et al., 1981) when more than two authors are involved. Collapse multiple citations as in (Gusfield, 1997; Aho and Ullman, 1972). Also refrain from using full citations as sentence constituents. We suggest that instead of

"(Gusfield, 1997) showed that ..." you use

"Gusfield (1997) showed that ..."

If you are using the provided LATEX and BibTEX style files, you can use the command \newcite to get "author (year)" citations.

References: Gather the full set of references together under the heading References; place the section before any Appendices, unless they contain references. Arrange the references alphabetically by first author, rather than by order of occurrence in the text. Provide as complete a citation as possible, using a consistent format, such as the one for Computational Linguistics or the one in the Publication Manual of the American Psychological Association (American Psychological Association, 1983). Use of full names for authors rather than initials is preferred. A list of abbreviations for common computer science journals can be found in the ACM Computing Reviews (Association for Computing Machinery, 1983).

The LATEX and BibTEX style files provided roughly fit the American Psychological Association format, allowing regular citations, short citations and multiple citations as described above.

Appendices: Appendices, if any, directly follow the text and the references (but see above). Letter them in sequence and provide an informative title: **Appendix A. Title of Appendix.**

3.8 Footnotes

Footnotes: Put footnotes at the bottom of the page and use 9 points text. They may be numbered or referred to by asterisks or other symbols.2 Footnotes should be separated from the text by a line.

3.9 Graphics

Illustrations: Place figures, tables, and photographs in the text near where they are first discussed, rather than at the end, if possible. Wide illustrations may run across both columns. Colour illustrations are discouraged, unless you have verified that they will be understandable when printed in black ink.

Captions: Provide a caption for every illustration; number each one sequentially in the form: "Figure 1: Caption of the Figure." "Table 1: Caption of the Table." Type the captions of the figures and tables below the body, using 11 point text.

4 Length of Submission

All revised submissions may consist of up to **4 pages of content**, plus **two extra pages max for references**. Submissions that do not conform to the specified length and formatting requirements may not be included in the on-line proceedings.

Acknowledgments

The acknowledgments should go immediately before the references. Do not number the acknowledgments section.
